DETAILED ACTION

1. This is response to Applicant Amendment filed on 08/09/2007. Claims 27-36 are pending. Claims 1-26 have been canceled; Claims 27-36 have been added.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Viet Tong (Reg. 45,416) on 09/05/2007.

The Application is amended as the following:

As per claim 27:

line 8, after "vectors" inserts -- , the first vector including instances of the first template, wherein at least two instances of the first template have similar function and structure, and share at least one control signal --.

line 10, after "set of vectors" inserts -- , the second vector including instance of the second template, wherein at least two instances of the second template have the same number of input and output --.

As per claim 33:

line 8, after "vectors" inserts -- , the first vector including instances of the first template, wherein at least two instances of the first template have similar function and structure, and share at least one control signal --.

line 10, after "set of vectors" inserts -- , the second vector including instance of the second template, wherein at least two instances of the second template have the same number of input and output --.

Allowable Subject Matter

3. Claims 27-36 are allowed.
4. The following is an examiner's statement of reasons for allowance: the prior art made of record does not teach or suggest the inventive steps in combination with other limitations recited in claim 27 and similarly to claim 33, the inventive steps comprise: grouping at least one instance of a first template in the logic design based on the control input and a databus input for the logic design to generate a first vector of the set of vectors, the first vector including instances of the first template, wherein at least two instances of the first template have similar function and structure, and share at least one control signal, the databus input including at least one databus identifier; and grouping at least one instance of a second template based on circuit connectivity of the logic design to generate a second vector of the set of vectors, the second vector including instance of the second template, wherein at least two instances of the second template have the same number of input and output.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2825

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. PTO-892.
